BOTALIP®

An INNOVATION
for the treatment of
the lip CONTOUR

BOTALIP® is an outstanding combination between the beneficial effects of Ivy, Calendula and Horse Chestnut extracts, reinforced by the action of Papain and Hyaluronic acid to treat the outlines of the lips.

Vertical wrinkles around the lips are among the most disturbing premature skin aging signs. They often appear early, specially with smokers and are difficult to treat.

BOTALIP® lip contour cream acts directly on the formation of this phenomenon.

Its regular use diminishes remarkably the amount as well as the depth of the wrinkles around the lips restoring lip contour youth and beauty.
