ESSENTIAL[®] SUPPORT

Exclusive & advanced guard formula
Natural health balance and youth

*An outstanding, exclusive and advanced guard formula
to maintain the skin's natural health balance and youth.*

ESSENTIAL SUPPORT[®] contains peroxidases charged liposomes (to fight the action of free radicals), hyaluronic acid (an excellent agent of development) as well as a group of substances produced by all living cells following an injury, known as TRF (Tissue Respiratory Factor). These substances, also called BIODYNES, have a stimulating effect on the production of new collagen and elastin molecules and act as healing agents.

ESSENTIAL SUPPORT[®] oxygenates the epidermis. It helps the skin fight free radicals and favours cutaneous regeneration.

ESSENTIAL SUPPORT[®] is recommended for flaccid, tired, aging, devitalized and damaged skin conditions. For women and men of any age.

An application of **ESSENTIAL SUPPORT[®]**, once or twice a day, on a cleansed skin of face and neck, prior to the moisturizer, will help the skin keep or recover its glow and natural youth.
