Dr. MEHRAN, Skin Care Products Inc.  
is proud to present :

## PELICULA®

***A new gel-mask that can be removed  
like a skin...***

**Soothing, moisturizing and nourishing it  
also acts as a mild exfoliation and  
refreshes the skin.**

**PELICULA®** is a gel-mask belonging to the PH7® line of DR. MEHRAN® products for normal and dry skin. This mask is applied in fine layers on face and neck. Once the mask is dried, it is removed in a transparent and uniform film embossed with the skin relief. This mask does not stick to hair and procures a delightful sensation of freshness and cleanliness.

**PELICULA®** is gentle enough for all skin types (not suitable for extra sensitive skins). If used close to the eyes, it is recommended to apply a compress moistened with BLUE lotion on the eye contour meanwhile the mask is drying.

One of the advantages of **PELICULA®** mask is that it may be used as a rubbing mask too. In this case, apply a thin layer of the mask on the area to treat, let dry for a few minutes and then start rubbing. The result will be a soft clear skin ready to receive the active ingredients of products such as ESSENTIAL SUPPORT serum and DR. MEHRAN® liposomes gel-cream.

**PELICULA®** mask contains Witch Hazel, Horse Chestnut and Cucumber extracts, as well as Papaya, Vitamin F, Citric Acid and Menthol. The use of this high quality mask is recommended once a week in complement of other DR. MEHRAN® skin care regimen.
